2366** **ALTERNATE TO ITEM 1866**
 This alternate finds that under the New Regulatory Framework (NRF), Verizon has provided excellent customer service. Pacific Bell has provided generally good service, but several of its operations suffer from poor service quality. The alternate reaches these conclusions through a statistical examination of the direct measures of service quality provided by Pacific Bell and Verizon to this Commission and to the FCC. The alternate further finds that Verizon and Pacific Bell developed different service quality records during the NRF period, but that both show an improving trend in service quality. This evidence casts doubt on the proposition that NRF systematically decreases the quality of customer service.

This decision determines that the respondents, Hillview and Forrester violated Section 491 and Section 825 of the California Public Utilities Code. The respondents must prepare a reconciliation of accounts for the period from January 1, 1991, to and including July 31, 1998. 2186****A01-02-030 - Southern California Edison Company (SCE).**

This decision denies the application of SCE to recover in distribution rates, Administrative and General (A&G) and General and Intangible Plant (G&I) expenses that have been booked in the Transmission Revenue Requirement Reclassification Memorandum Account (TRRRMA) established in 1998 pursuant to Res E-3544. TRRRMA was established to give SCE an opportunity to recover costs that the utility had classified as transmission-related, but which the Federal Energy Regulatory Commission (FERC) declined to include in transmission rates. In the proceeding that resulted in Opinion 445, FERC declined to include approximately \$24 million of SCE's annual A&G and G&I costs in transmission rates because FERC concluded that its traditional labor ratio allocation methodology should be used rather than the multi-factor allocation methodology advocated by SCE. This decision concludes that the A&G and G&I costs at issue are not eligible for recovery in distribution rates because SCE has failed to offer any proof that the costs are both reasonable and distribution-related, as Res E-3544 requires. This alternate of Commissioner Lynch approves SCE's petition for modification of D02-11-027 with modifications. This alternate approves SCE's request to defer conducting a cost of capital proceeding until next year, as does the ALJ's proposed decision. However, unlike the ALJ's proposed decision, this alternate also reduces SCE's return on equity for 2004 to 11.22% from the currently adopted return on equity from 11.6%. This reduction is necessitated by the expiration this year of a trigger mechanism that had frozen SCE's return on equity at 11.6% since 1997. Absent the trigger mechanism, the appropriate return on equity for SCE is the same as adopted for PG&E, 11.22%. (Comr Lynch)
